CAPTURE THE FEELING
OF TWIN CAM
PERFORMANCE

The tach needle flicks upward as the race-bred Toyota Twin Cam engine comes to life. You're ready to enter the world of high performance with Celica Supra for 1984.

SUPRA

Supra is ready with a pulse-quicken-
ing burst of acceleration to merge
with cross-town traffic. Ready to effort-
lessly cruise cross-country. And ready
for the demands of rush-hour traffic
or the challenge of a tortuous moun-
tain road. For 1984, the legendary
Supra is even more of what the driving
enthusiast's dreams are made of:
a world-class Grand Touring auto-
mobile with sleek styling, superb
handling, breathtaking performance,
abundant comforts and impeccable
interior refinements. All the right stuff.

Supra's 28 liter 6-cylinder elec-
tronically fuel-injected Twin Cam
powerplant is Toyota's most powerful
engine ever. The close-ratio 5-speed
overdrive transmission is perfectly
matched to the Twin Cam engine's
broad power band.

For confident handling and superb
roadability, Supra features variable
assist power rack-and-pinion steering,
independent rear suspension, limited-
slip differential, wide 225/60HR14
raised-black-letter steel-belted radial

tires on 14"x7" aluminum alloy wheels,
and ventilated and power-assisted 4-
wheel disc brakes. And to improve
high-speed aerodynamics, Supra has
a new front air dam.

If the world of high-performance
motoring beckons you, capture the
feeling at its exhilarating best with
the 1984 Supra.

chart for details.

Race-Proven Technology

Supra's independent rear suspension provides superior handling and cornering performance. It helps keep Supra's wide, raised-black-letter radials in full contact with the road.

Aerodynamic Styling

Supra's sleek shape is the result of extensive wind tunnel testing. In addition to pleasing the eye, Supra slips through the wind with a low coefficient of drag — only .348.

Responsive Handling

Variable assist power rack-and-pinion steering feeds the feel of the road back to the driver at higher speeds, provides more steering assist during low-speed maneuvering.

THE ERGONOMIC DRIVING ENVIRONMENT

When you settle into Supra's cockpit, you experience the successful interfacing of man and machine—a crucial factor in a high-performance road machine. Like a custom-fitted race car seat, the Supra driver's 8-way adjustable Sport Seat holds and

supports you in position for optimum comfort and control. This Sport Seat provides a virtually limitless range of adjustments: fully reclining seatback, 4-way adjustable headrest, seat cushion height, thigh support, and side bolster width. A unique 3-pillow pneumatic lumbar support system helps relieve lower back fatigue on long trips. The Sport Seats are available in attractive cloth or optional soft, full-grain leather upholstery.

Supra's controls are positioned for fast, easy operation and instruments are clustered for quick reading, day or night. The electric tachometer, 130 mph speedometer with resettable trip-meter, and gauges for engine oil pressure, coolant temperature, battery voltage and fuel level let you monitor Supra's performance at a glance.

For year-round comfort, Supra's automatic temperature control air conditioning system lets you maintain any preset temperature through heat of day or cool of night. An electronic

AM/FM/MPX stereo tuner with five speakers, cassette and graphic equalizer produces dynamic sound that rivals the finest home stereo systems.

The unity of man and machine has never been more apparent than in the 1984 Supra's cockpit, a true driver's environment.

Racy!

Command Performance

Supra puts you in command and control. Instruments are clustered directly in front of the driver for quick, effortless reading. All switches and controls are located for easy access.

FULLY RECLINING SPORT SEATS

8-WAY ADJUSTABLE DRIVER'S SPORT SEAT

The Ultimate Driver's Seat

Driver's Sport Seat, upholstered in rich, textured cloth, adjusts eight different ways for total comfort and support. Unique 3-pillow pneumatic lumbar support helps reduce lower back fatigue while driving. The leather-wrapped steering wheel has tilt adjustment for most comfortable driving position.

SUPRA L-TYPE

THE ELEGANCE OF GRAND TOURING

Supra L-Type is sleek and sophisticated. Although the elegance of this Supra may be understated, its performance is not. A 2.8 liter electronically fuel-injected 6-cylinder Twin Cam engine and Electronically Controlled 4-speed automatic overdrive transmission with shift pattern selec-

tor and lock-up torque converter transform power into action.

Inside, comfort greets you as you slip into the softly cushioned, richly textured cloth seats. An optional Electronic Display Instrument Panel with graphic tachometer, digital speedometer, dual-mode fuel level indicator, coolant temperature indicator, and Trip Computer offers you tomorrow's instrumentation today.

BUCKLE UP... IT'S A GOOD FEELING!

Toyota makes it easy for you and your passengers to get into "the seat belt habit." We urge you to use your seat belts every time you drive. Safety experts say, "Buckle up!" Here are a few good reasons why:

- When properly adjusted, seat belts can help the driver maintain better vehicle control.
- Studies show that generally the safest place in a collision is inside your vehicle. Seat belts can help keep you there.
- Small children can be injured during quick turns or sudden stops; they should be provided with a child restraint

system dynamically tested to meet federal standards. Select a restraint system carefully.

The seat belts in the 1984 Supra are not only designed to meet or exceed all government requirements for effectiveness, but are also engineered for simple operation and maximum comfort.

- Front seat belts with Emergency Locking

Retractors allow complete freedom of normal movement for the driver and front passenger, but under severe changes in vehicle motion, they automatically lock to restrain body movement.

- The Seat Belt Tensioner System helps draw the driver's seat belt out of the way for easier entry and exit when the door is opened.
- Rear seat belts with Automatic Locking Retractors self-lock in position after the user buckles up. They permit installation of child restraint systems. It is

QUALITY CARS, PARTS & SERVICE

Toyotas are designed and built for customer satisfaction. That's why, in an independent owner survey[†] covering 25 major import and domestic one-year-old cars sold in America, Toyota owners reported less service and repairs needed, giving a higher level of satisfaction than any make except Mercedes-Benz.

Every Toyota is tested and inspected at every stage of manufacture, and is

covered by Toyota's 2-year/24,000-mile limited powertrain warranty.^{††}

Toyota dealer parts and service reflect the same quality and dependability you'll find in the 1984 Toyotas. A computerized parts inventory control system helps assure availability of Genuine Toyota and Toyota-approved Parts at nearly 1,100 dealers nationwide. Also, Toyota-trained service technicians use the latest equipment to care for your Toyota. That's why Toyota owners

reported the lowest incidence of repairs and the best parts availability of any import or domestic make.[†]

You can count on Toyota dealers to help you keep that Toyota feeling.
